

# WhosOnLocation VISITOR MANAGEMENT AND MUSTERING SOLUTION

Brivo and WhosOnLocation have partnered to provide a secure, cost effective and scalable building access control platform with integrated mustering and visitor management technology.

## YOUR CHALLENGE

Safety and security starts with controlling access to your facility and knowing who is on-site at all times.

You need to offer employees, visitors and contractors flexible access to the facility, but also confirm when and how long they actually were present.

In the event of an emergency, it is critical that facility managers are able to get a quick and accurate list of who is on-site at the time. Only then can you be 100% sure that your facility is safe, secure, and under control.

## THE SOLUTION

Brivo Onair® access control and WhosOnLocation visitor management and mustering solutions ensure that you are only granting automated access to authorized individuals, and can keep track of visitors at all times.

You now know who is accessing your facility and when. You can give temporary access to vendors, contractors and consultants. More importantly, using the WhosOnLocation mustering and roll-call mobile app, you have visibility into everyone who is on-site via the built in mustering report.

In the event of an emergency you can quickly verify everyone's safety. You can track actual time spent on location and generate reports for your leadership team.

With Brivo Onair and WhosOnLocation you are able to provide a secure and flexible work environment for all of your facility entrants.

# HOW THE INTEGRATION WORKS

- Quickly sign-in visitors, including large groups, and provide guests with badges
- Pre-register visitors and consultants and create temporary badges
- Receive automatic notifications and reports via email and SMS
- Monitor and manage who is on-site and reconcile invoices against contractor time on-site
- Simple integration of two products to ensure stronger security practices
- Mustering capability to ensure all building entrants are accounted for in case of an emergency
- User upload, sharing, and list management via WhosOnLocation or Brivo Onair
